SUMMARY

Computer Science student with hands-on experience in backend and full-stack application development using Java, Spring Boot, Node.js, and MongoDB. Strong foundation in OOP, data structures, RESTful API development. Built scalable backend systems with authentication, CRUD operations, and data persistence. Seeking an internship to apply problem-solving and backend engineering skills in production-level environments.

EXPERIENCE

WebCrafter 2.0 – GeeksforGeeks Student Chapter

29 January 2025 – 30 January 2025

2-Day Hackathon | Team-Based Project

- Developed 5+ responsive UI components for an educational web platform within a 48-hour sprint.
- Collaborated in a 4-member team and deployed the project using Git and GitHub for version control and public access.

EDUCATION

Chitkara University

2023-2027

Bachelor of Engineering in Computer Science (Current CGPA : 8.13)

SKILLS

Programming Languages: Java, C++, JavaScript, SQL

Core CS Concepts: Data Structures and Algorithms, OOP, MVC Architecture, API Design

Backend: Node.js, Express.js, Spring Boot, JDBC, REST APIs

Frontend: HTML, CSS

Databases: MySQL, MongoDB

Tools: Git, GitHub, Postman

PROJECTS

PotionMaster – Java Console Game

Java, OOP, Data Structures and Algorithms, File Handling

- Built a console-based game with secure login/registration and persistent gameplay data using file handling.
- Planned modular architecture applying OOP principles and DSA for managing inventory and recipes.
- Implemented structured user flow and session tracking.

Employee Management & Payroll System

Java, Spring Boot, JDBC, MySQL

- Structured an admin-controlled backend with REST APIs for managing employee and payroll data.
- Created relational database schema and executed optimized CRUD operations using JDBC.
- Automated monthly salary slip generation to streamline payroll workflow.

UConnect – Social Media Backend

Node.js, Express.js, MongoDB

- Engineered RESTful APIs supporting users, posts, and interactions across multiple collections.
- Maintained scalable MongoDB schema with modular routing and middleware architecture.
- Applied authentication and structured backend workflow for future frontend integration.

CERTIFICATIONS

- Introductory C Programming Specialization
- Blockchain Scalability & Distributed Systems
- Introduction to Blockchain for Financial Services
